EXPERIENCE

UNDERGRADUATE RESEARCH ASSISTANT

SAFE-T Research Project | Carnegie Mellon University

2025 – PRESENT

Focused on making software development and tech spaces more accessible to neurodivergent employees, the study focuses on where neurodivergent needs create an obstacle for employees and students. By analyzing the needs of students – specifically by analyzing sentiment of interview transcripts – the research aims to create tools and measures to create a more accessible work environment.

SOFTWARE ENGINEERING INTERN

LNJ Technologies | Los Angeles, CA

MAY 2023 - AUG 2023

Focused on making software solutions for data management for various clients. During the internship, I was tasked with taking on projects to address a variety of needs ranging from data cleaning and management to database logistic solutions.

UNDERGRADUATE LIBRARY ASSISTANT

Hunt Library | Carnegie Mellon University
